POWER FACTOR ADJUSTMENTS: At the option of the District, billing adjustments for power factor may be made, when the power factor, as determined by test, at the time of Customer's maximum use is less than ninety percent (90%). The multiplier to be used for billing adjustment will be determined by dividing .90 by the Customer's power factor (expressed in percent) at time of maximum use.

TERMS OF PAYMENT: The above rates are net, the gross rates being five percent (5%) higher. In the event the current bill is not paid within the discount period shown on the bill the gross rate shall apply.

The annual minimum charge is due and payable in advance each year. The District will read the meters during the month of December each year. Billing for actual usage shall be rendered annually at the net rate and will be due and payable in January of each year. In the event the current annual bill is not paid within the discount period the gross rate, which is five percent (5%) higher, shall apply.
